

PrismaSeT XS

Surface and flush enclosures

At Schneider Electric we work on solutions you use to propose to your clients. This new offer is suitable for small businesses such as little shops and restaurants and also for High Residential installations. Our complete solutions include large range of devices to control and monitor the loads and applications to manage them.

PrismaSeT XS

Benefits

- Enhanced level spelling for Electricians and installers
- Attractive design and fully robust
- Fully compatible with products from the Schneider Electric brand both devices and Distribution accessories
- Ease of installation
- Provides more flexibility to the consumer
- Wider range of terminal blocks (screw or screw-less) - provided or available as accessories

Functions and technical data

PrismaSeT XS

Surface mounting enclosures

A range of ready-to-use enclosures devised for electricians: ergonomics and flexibility of installation. The PrismaSeT XS offer is particularly robust, especially the 24 Modules enclosures thanks to their metal back part of the structure.

Function

This distribution enclosure is intended for top of the range residential and tertiary sectors. All enclosures are provided with white Plain or Transparent door. All PrismaSeT XS is suitable for all applications up to 125 A and can accommodate all proper Schneider Electric devices. The 24 Modules enclosures can also accommodate a vertical Acti9 VDIS distributor. 24 Modules size has Removable din Rail facilitates wiring and maintenance operations. PrismaSeT XS is also integrating a Universal Version can be used for non-electrical distribution applications.

Description

Modular terminal blocks with screwless quick connections for small cables are provided in 18 and 24 Modules enclosure size

Earth terminal blocks.

Vertical distribution with Screwless connection can be installed on lateral side of 24 Modules

PrismaSeT XS

Surface mounting enclosures

A range of ready-to-use enclosures devised for electricians: ergonomics and flexibility of installation.

The PrismaSeT XS offer is particularly robust.

The surface mounting enclosures

The range consists of enclosures with a width of 13 or 18 modules of 3 rows.

Function

This surface enclosure is intended for the top of the range residential and tertiary sectors. The universal version is the best solution for all the non electrical distribution application like multimedia central or alarm; thanks to DIN Rail and the universal grid, all components are compatible.

Smart accessories let you move around the components the way you like, creating a structure in perfect order and tailor-made for your customer's needs.

The consistency in design with distribution enclosure range allow best installation in term of aesthetic and technology.

PrismaSeT XS Universal can be associated to electrical distribution enclosure and guarantee a good final design.

PrismaSeT XS

Flush mounting enclosures

PrismaSeT XS is a modular enclosure range combining ergonomics, attractive design and robustness at top level.

This new enclosure, available in surface- and flush-mounted versions, has class II total insulation.

The flush mounting enclosures

The range consists of enclosures with a width of 13, 18 or

Easy installation and large cabling space.

The chassis shapes are rounded and are cable friendly and finger safe.

PrismaSeT XS

Flush mounting enclosures

A range of ready-to-use enclosures devised for electricians: ergonomics and flexibility of installation. The PrismaSeT XS offer is particularly robust, especially the 24 Modules enclosures thanks to their metal back part of the structure.

A whole host of flush mounting options

Removable entry plates.

Gypsum board mounting kit LVSXX5.

Wall-mounted chassis adjustable horizontally and in depth

The front face of the enclosure is always horizontal, whatever the position of the rear part flush-mounted in the wall.

Modular terminal blocks with screwless quick connections for small cables

Screwless terminal blocks are provided in 18 and 24 Modules

Function

This distribution enclosure is flush-mounted in masonry or in gypsum partition. All enclosures are provided with white Plain or Transparent door. It is intended for the top of the range residential and tertiary sectors. All PrismaSeT XS is suitable for all applications up to 125 A and can accommodate all proper Schneider Electric devices. PrismaSeT XS is also integrating a Universal Version can be used for non-electrical distribution applications.

PrismaSet S

Surface enclosures

At Schneider Electric we work on solutions you use to propose to your clients. This new offer is suitable for small businesses such as little shops and restaurants and also for High Residential installations. Our complete solutions include large range of devices to control and monitor the loads and applications to manage them.

PrismaSeT S

Benefits

- Enhanced level ergonomics for Electricians and installers
- Attractive design and fully robust
- Fully compatible with products from the Schneider Electric brand both devices and Distribution accessories
- Ease of installation
- Provides more flexibility to the consumer
- Wider range of terminal blocks - provided or available as accessories
- Complete range of modular enclosures and accessories designed for application up to 160A

Removable DIN Rail

Removable DIN rails facilitate wiring during realisation and maintenance phase.

Removable lateral side and Top/Bottom Part

Sides and Top/Bottom parts can be removed to give access of wiring during both phases, panel realisation and maintenance.

NSXm Installations

Thanks to NSXm devices it's easier to realize Panels up to 160A, NSXm could be installed on DIN rail or dedicated plate, into enclosure or lateral duct.

VDIS

Vertical distribution VDIS allow to reduce installation time and connection availability on all. 160 A version is provided with flexible cables.

SPD Connector Kit

Brings main earth connector up to 50 mm near SPD reducing wiring length.

Lateral Duct

On 6-7-8 row size, is also available a version with integrated lateral duct can be used to allocate terminals, cables or main incomer, improving accessibility and making easier installation phase.

LV5SD24_Image.eps

Enclosure manufactured with recycled plastic.
Most of the plastic components contain recycled material.

PrismaSet S

Surface mounting enclosures

Offering a selection of robust, the simple-to-install surface mounted modular enclosures PrismaSet S provide you with maximum flexibility whilst ensuring installations stay thoroughly protected. This new enclosure, available in surface-mounted versions, has class II total insulation.

The surface mounting enclosures

The range consists of enclosures with a width of 24 modules of 4 to 8 rows. The 6-7-8 row is also available with integrated lateral duct. Wide accessibility thanks to all removable sides and large cabling space make easier the wiring and the installation.

Benefits

- Attractive design and fully robust
- Ease of installation
- Wider range of terminal blocks provided or available as accessories
- Enhanced level ergonomics for Electricians and installers
- Fully compatible with products from the Schneider Electric

Functions and technical data

PrismaSeT S

Surface mounting enclosures

A range of ready-to-use enclosures devised for electricians: ergonomics and flexibility of installation. The PrismaSeT S offer is particularly robust, thanks to their metal structure, already assembled.

Thanks to internal plastic, the entire PrismaSeT S range has "total insulation" no components on the enclosure, duct or door, need to be earthed.

Function

This Wall-mounted distribution enclosure is intended for top of the range residential and tertiary sectors.

The enclosures and the lateral duct have a bigger space on first row to accommodate the NSXm 160 incoming circuit-breaker or switch, equipped if necessary with an earth leakage protection module and a vertical Acti9 VDIS distributor.

Removable din Rail facilitates wiring and maintenance operations.

All enclosures can be equipped with white Plain or Transparent door, only white plain door available for lateral duct

Mounting enclosures

Electrical accessories: compact terminal blocks

- Rated insulation voltage U_i : 400 V.
- Impulse withstand voltage U_{imp} : 4 kV.
- Behaviour with the current of short-circuit: the breaking capacity reinforced in filiations of the distributors and Minibloc connector blocks, was checked until 30 kA rms in the cases of associations apparatus upstream - distributor - apparatus downstream for ranges of apparatuses Schneider Electric.
- Complies with IEC standard 60947-7-1.
- IP degree protection: IP20 in accordance to IEC 60998.

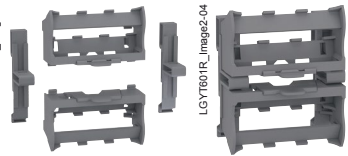

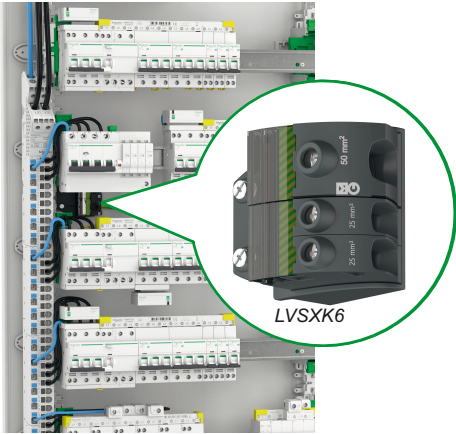

The connections of the terminal blocks (either spring or screw connections), specially developed by Schneider Electric, allow connection of flexible or rigid wires with and without terminals.

Screw distribution blocks

IEC/EN 60947-7-1, IEC/EN 61439-1 & 2

Description

- Single-pole or four-pole distribution block that can be installed on a standard DIN rail or on a mounting plate.
- Incomers and feeders are connected to screw terminals that accept rigid or flexible cables with ferrule.
- Optional: additional neutral terminal strip for four-pole distribution block.

Advantages

- Simplified power supply for main incomers.
- Easy phase balancing.
- Easy, effortless cabling due to excellent accessibility.
- Visible cabling.
- Insulation between phases.
- The single-pole distribution blocks are adjacent and bridgeable via the second incoming hole for parallel connection.

Quick distribution blocks

IEC 60947-7-1, IEC 61439-2

Description

- Single-pole or four-pole distribution block that can be installed on a standard DIN rail or on a mounting plate.
- Downstream circuits are connected from the front, to spring terminals.
- Contact pressure automatically adapts to the size of the conductor.
- Contacts are insensitive to vibrations and thermal variations.
- Only one cable (flexible or rigid) can be inserted per terminal.

Acti9 VDIS

Vertical distribution blocks up to 160 A

■ Direct clipping on Chassis and Flexible cable delivered on 160 A version facilitate installation and wiring.

■ Space release on Din-rail thanks to side installation.

■ Reduces SPD cable length.

■ Direct and frontal access to head of groups and groups of devices reduces length of cables simplify connections reducing wiring time.

■ Immediate time saving thanks to screwless and push-in technology.
 ■ High reliability of cabling thanks to spring terminals.

■ Easy phase balancing thanks to large number of connection points.

■ Connection point are always accessible and near to DIN-rail, this make easier extensions and modifications.

Acti9 VDIS

Vertical distribution blocks up to 160 A

IEC/EN 60947-7-1, IEC/EN 61439-2

As per the above standards:

Description

- 4P distribution blocks with quick connections.
- Designed for both rigid cables and flexible cables with or without ferrules.
- Push-in technology.
- Optimised installation in PrismaSeT XS 24 Modules and prismaSeT S (surface mounting).
- Only three versions to cover all configurations.
- 160A version delivered with flexible cables.

Acti9 VDIS

Vertical distribution blocks up to 160 A

Power supply for 125A

- Four-poles tunnel terminals with screw clamping
- Cable per connection point:
 - flexible from 10 to 35 mm²
 - flexible with insulated ferrule from 10 to 35 mm²
 - stranded from 10 to 35 mm²

Power supply for 160A

- Four-poles tunnel terminals with screw clamping
- Cable per connection point:
 - Only cables provided must be used

Distribution connections

- Connection to spring terminals through the front
- A single cable per connection point:
 - rigid from 1.5 to 10 mm²
 - stranded from 4 to 16 mm²
 - flexible from 1.5 to 16 mm²
 - flexible with ferrule from 1.5 to 16 mm²
- Push-in spring for toolless connection for both rigid and flexible cables with ferrules
- Maintenance free
- Connections:
 - A9XPK707: 7 per phase, 12 neutral
 - A9XPK714: 14 per phase, 24 neutral
 - A9XPK715: 14 per phase, 24 neutral

Installation

- Clip-on directly in PrismaSeT 24M chassis, locking clips included

Stripping length

- Rigid or flexible

Flexible with ferrule

PrismaSeT XS-S

Dimensions

At Schneider Electric we work on solutions you use to propose to your clients. This new offer is suitable for small businesses such as little shops and restaurants and also for High Residential installations. Our complete solutions include large range of devices to control and monitor the loads and applications to manage them.
